

EUROPEAN *W*INE SUMMIT

25 June 2026, Taranto (Italy)

BACKGROUND

An unprecedented number of structural and conjunctural challenges are currently affecting the EU wine sector. Climate change, declining wine consumption, changing consumer trends, geopolitical and trade uncertainties, rising production costs or regulatory complexity are some of them.

The European Wine Summit will bring together policymakers, wine sector representatives, academics, and other key stakeholders to assess the challenges ahead and identify concrete solutions capable of ensuring the long-term sustainability of the sector.

The Summit aims to contribute to a coherent and forward-looking policy framework that supports resilience, investment, competitiveness and sustainable growth across the EU wine value chain.
